“ Thanks for organising our hire plants for Foveaux Street. I wanted to let you know how happy we are with the plants and how much better they look now that the ‘professionals’ are taking care of them. Although we thought we would be able to care for the plants ourselves, we couldn’t and they were in quite a sad state when you arrived to rescue them! The retailers in the building have given very positive feedback on how healthy and revived the place looks. Thanks again ”

“ A huge Thank You to you for the wonderful service you provided our company Trademaster. Our setup looks amazing, and since it was completed an hour ago, everyone that has walked in has complimented us on it. You are a beautiful person and it was so easy to deal with you. Your an asset to your company. Also, huge thank you to the gentleman who came out and installed everything. He was so nice and professional. Another asset to your company. ”

Innovation...
we are at
the top of
our game

“We don’t just find out what plants
our clients want. We understand their
concepts and designs to ensure the
results align with their overall project”

Moss in bedroom

Moss with logo

“Cachet Group have known Green Design for many years, working closely through the design phases of our projects to provide great lasting green solutions for our clients. The end result has always been an overwhelmingly positive result from our clients and hence we had no hesitation in contacting Craig and the team at Green Design to provide a new innovative solution at one of our flagship projects - WT Partnership.

Having visited the WT Partnership space on a number of occasions for key functions since the installation, I can honestly say that the Moss Wall is always a crowd favourite for its ability to create colour, texture and a magical feel all without additional lighting or irrigation. Whilst the project itself has received many accolades, the Moss Wall has been a big contributor to the end result and the team at Green Design need a special mention on this for their professionalism, high level of commitment to the end product and service. Their contribution can be seen in the project video on our website at <http://cachetgroup.com/our-work/>.

I would not hesitate in recommending them to anyone which we commonly do. We look forward to working closely into the future with them as a key partner.”

“After working for Green Design for over 18 years, I never get tired of hearing client praise the plants in their offices and how good they look. I take pride in making sure the plants always look their best and it's something I truly enjoy doing.

Green Design is a family business but over the years I've watched it grow to a team of over 30 staff who all contribute to make sure the client ends up with a great service. Everyone loves working with and around plants and that's what makes the company successful and ultimately the clients happy! ”

“Thanks for looking after our plants for the last few years. A quick note to praise your team who have done a great job of keeping our plants looking fantastic. The recent additional plants and revamp of pots has made a huge difference to our team. People love coming to work! The coloured pots have really brightened up the space and we feel at home in our ‘forest’. So much so that we would like more plants. Let’s get together to discuss the next installation and hopefully this will add to the already positive vibe which is noticeable within our team. Thanks again and chat soon”

productive

Plants for a healthy workplace

Indoor plant hire has become an integral part of ensuring health benefits to both the office environment and the people within them. Plants must be maintained by a professional plant hire company to be included in the key 'Green Star Rating Tool' used by the Green Building Council of Australia (GBCA). This is because they understand the benefits of using plants to clean the air is only useful where the plants are maintained in a healthy condition and this can only be achieved with professional care.

Increase productivity and reduce sick days

We all know people feel good about being around plants. But...did you know there is a scientific name for this? It's called Biophilia and it relates to people's love of life or living systems. It has been used to describe the psychological connection that humans seek with the rest of life.

What the experts say

The UTS Brochure, Indoor Plants Work, states that: Science shows that indoor plants:

- Reduce indoor air pollution
- Reduce workplace illness
- Reduce sick-leave absences
- Reduce stress and negativity
- Do not create unhealthy mould problems
- Raise performance and productivity
- Improve job satisfaction
- Enhance business image with potential clients
- Improve school performance and patient wellbeing
- Contribute to meeting at least 75% of indoor environmental quality (IEQ) criteria

Save time... Save Money...

Buying Plants V's Professional Plant Hire Service

Well maintained indoor plants can create a more welcoming atmosphere to your customers.

- There is an economic benefit associated with well maintained plants (see below)
- The effective life of a plant indoors can vary from 3 months to 18 months
- From an aesthetic point of view it is better to have no plants than sick plants
- Indoor plants that are not well maintained can create a negative impression.

The work involved in owning your own plants

- 1. Plants and Containers:** Your staff will need to research pots and plants that are suitable and include incidentals such as wood chip or pebbles, waterproof inserts if required, clippers, leaf shine, watering cans etc.
- 2. Maintenance:** You should allow time for you or your staff to water, clip, clean, shine and purchase replacement plants. Staff often avoid being chosen to be responsible for the plants.
- 3. Replacement Plants:** You will need to replace your plants approx every 6-9 months. (We replace approx every 12-18 months with professional plant technicians!). Don't forget to allow time to research a supplier, find the right plants, organise the purchasing process, delivery and installation and pot up the new plants.

Cost Comparison over 24 months

Cost to Purchase

Cost to purchase a 1.5m Happy Plant:	\$140.00
Cost for a waterproof planter pot (approx one off purchase):	\$150.00
Cost to replace plant (x 2 over 24 months):	\$280.00
Delivery and Installation x 3 (varying price depending on site)	\$150.00
Total Cost for one plant/pot over 24 months:	\$720.00

Cost to Hire (includes full service)

Approx hire of a 1.5m Happy Plant 24 months in waterproof pot:	\$360.00
Cost to replace plant over life of rental:	\$0.00
Cost to update pots to new colours (within reason):	\$0.00
Maintenance over life of rental (included):	\$0.00
Total Cost for one plant/pot over 24 months:	\$360.00

You don't need to do a thing!

How does Indoor Plant Hire work?

Indoor plant hire is a complete Indoor Plant Service. We bring our (fully waterproof) pots and plants into your office and we maintain them for you, including replacing them if they get sick. You don't need to lift a finger as we do it all for you and your plants will never look tired.

What does it cost?

Your Indoor Plant Hire costs can vary depending on the types of pots used and number of plants. Our prices remain low by recycling our planters, which is also environmentally friendly.

A typical small office can come to life for around \$100 per month with a range of around 6 to 10 floor and desk plants.

Our consultants can assist you with plant and design options to maximise your results and offer value for money.

(Check with our sales team for the minimum monthly rental in your area)

How can I find out more ?

You can visit our Website or Facebook page, phone us on 9410 0204 or email sales@greendesign.com.au and we would be happy to send out some more information or even come out to provide an obligation free quote.

The advantages of using a professional plant service

- Plants are refreshed as required at no extra cost to you.
- You know the plants are going to look nice all the time as they are clipped, cleaned, shined and watered regularly.
- If you change your décor you can easily have your pots changed to suit. We have a huge range of planters and paint colours available.
- Plant species can also be changed to suit your changing needs.
- Our sub-irrigation system allows for minimal intrusion on your business as we generally only need to visit 4 weekly.
- Some plants get sick as soon as they arrive in a new environment (temperamental) and need replacing within a few months. This is all included within your plant hire costs.

When you want to choose your own designer planters...

For plants being incorporated into your own designer planters or customer joinery, the plants should remain in their grow pots, rather than filling the planter with soil. Certain dimensions are required to allow the pots to fit. If your dimensions are limited, Green Design can work with you towards a solution.

- Pebbles to finish off the planter
- The pebble-plate with holes for the pots. The plate holds the layer of pebbles and plants
- Ideally a quality membrane. (trays can sometimes sweat)
- If plants are to be sub irrigated, a 25mm gap from bottom of pot to planter is needed

Key:

- A: Planter depth top to bottom
- B: Planter top above pebble plate
- C: Min width of planter
- D: Cutout diameter in pebble plate

Some nursery pot sizes and planter dimensions for them

175 squat flower bucket for low profile planter

A: Total pot diameter including lip	190mm
B: Pot height, under lip	143mm

Planter dimensions should be

1: Planter height top to bottom	185mm
2: Planter top above pebble plate	40mm
3: Min depth of planter	230mm
4: Cutout diameter in pebble plate	180mm

Using 250mm inner pots

A: Total pot diameter including lip	265mm
B: Pot height, under lip	223mm

Planter dimensions should be

1: Planter height top to bottom	283mm
2: Planter top above pebble plate	40mm
3: Min depth of planter	308mm
4: Cutout diameter in pebble plate	245mm

Using 200mm inner pots

A: Total pot diameter including lip	205mm
B: Pot height, under lip	185mm

Planter dimensions should be

1: Planter height top to bottom	245mm
2: Planter top above pebble plate	40mm
3: Min depth of planter	250mm
4: Cutout diameter in pebble plate	195mm

Using 300mm inner pots

A: Total pot diameter including lip	320mm
B: Pot height, under lip	250mm

Planter dimensions should be

1: Planter height top to bottom	330mm
2: Planter top above pebble plate	50mm
3: Min depth of planter	360mm
4: Cutout diameter in pebble plate	295mm

In all that we do, we are guided by our Values

Mission Statement

What we are in business for

Green Design's mission is to provide vibrant and healthy workspaces through the installation of highest quality plants, sourcing and developing innovative new products and maintaining best practice for all clients while conducting a profitable and ethical business.

Vision

Where we would like to be

Green Design aims to be the best quality and most innovative indoor plant hire and vertical planting specialist throughout Sydney and it's surrounding regions.

Values

How we would like people in the organisation to behave so we can achieve the mission and vision

In our efforts to achieve our Mission and our Vision we shall be guided by the following Core Values throughout our entire business structure:

- A desire to provide our customers with a quality service
- A belief in the importance of integrity in all our business dealings
- A belief in the importance of economic growth
- A belief in the importance of professionalism in our approach to work and business relations
