

When you want to choose your own designer planters...

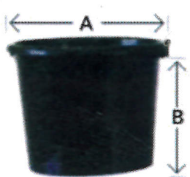

For plants being incorporated into your own designer planters or customer joinery, the plants should remain in their grow pots, rather than filling the planter with soil. Certain dimensions are required to allow the pots to fit. If your dimensions are limited, Green Design can work with you towards a solution.

Key:

- A: Planter depth top to bottom
- B: Planter top above pebble plate
- C: Min depth of planter
- D: Cutout diameter in pebble plate

Some nursery pot sizes and planter dimensions for them

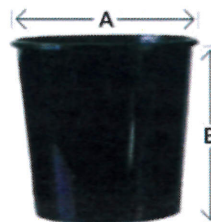

175 squat flower bucket for low profile planter

A: Total pot diameter including lip	190mm
B: Pot height, under lip	143mm
