AWARDS**

The easiest
living wall to
install, plant
and maintain.

Living Walls no longer need to be complicated.

NextGen Living Walls are a game-changer in the world of vertical greenery. They are designed to create full plant coverage from day one, transforming any ordinary wall into a beautiful and lush feature. With a modular system that allows for easy installation and maintenance, NextGen Living Walls are the perfect solution for any indoor or outdoor space.

At Green Design, we are proud to be the sole distributor of NextGen Living Walls in Australia and New Zealand. We have extensive experience with the system, having used it in many of our own projects and installations. We have seen firsthand the benefits that NextGen Living Walls can bring to any space, including improved air quality, reduced noise levels, and increased visual appeal.

Our team are highly trained and knowledgeable, and we are always happy to answer any questions you may have about the system. We are ready to work with you to help create green, beautiful, and sustainable spaces.

The Green Design Difference

With over 40 years of industry expertise we never let up on being ahead of the game. Accredited with our industry body, Interior Plantscape Association, and with our accredited Green Star Professional we know how to achieve the results you want.

Immediate Green Impact

Full plant coverage from day one

No repotting required

Plants remain in their nursery pots for an easy and tidy installation

Unmatched assurance

Unlock Peace of Mind when you choose our team of experts at Green Design to maintain your wall.

I used the Next Gen system from Green Design Indoor Plant Hire on my award-winning Melbourne International Flower and Garden Show and they really lifted the whole design to a level that saw me and the team awarded Best In Show. Green Design were great to work with and I can recommend them.

Charlie Albone
Director and lead Designer of Inspired Exteriors

Consultation

We meet with you to discuss your vision for your living wall, and create a customized design plan for your living wall, including the layout, plant selection, and irrigation system.

Installation

Our experienced team handle the installation of your wall, ensuring that it is securely and properly mounted, and that the irrigation system is functioning correctly.

Maintenance

Green Design provides ongoing maintenance and monitoring to ensure that your living wall stays healthy and thriving, and you don't have to do a thing!

What about lighting?

Proper lighting is a crucial factor for the success of any indoor green wall, and we understand its significance. At Green Design we offer a comprehensive service that goes beyond just the installation of the green wall itself.

We recognise that indoor plants require adequate light to thrive, and our team can identify the specific lighting requirements for your green wall. We'll work closely with you to determine the right type and quantity of lights needed, ensuring your plants receive the ideal amount of light for their growth.

While we don't handle electrical installations, we can guide you through the process and help you order the necessary lighting equipment. Your electrician can then easily install the lights, completing the perfect environment for your green wall to flourish.

Reap the Health Benefits: The Wellness Wonders of the NextGen Living Wall

NextGen Living Walls offer a multitude of health benefits that extend beyond their aesthetic appeal. These lush vertical gardens contribute to improved indoor air quality by absorbing harmful pollutants and releasing oxygen, creating a more refreshing and invigorating atmosphere.

Furthermore, green walls have been shown to reduce stress, boost productivity, and enhance overall well-being. The presence of greenery in indoor spaces can lower blood pressure, improve mood, and increase feelings of relaxation. It's not just a beautiful addition to your environment; it's a living, breathing source of wellness that can transform your space into a healthier and more vibrant place to live, work, or relax.

Transform your space with NextGen Living Walls by Green Design

We are passionate about creating living works of art that not only enhance the aesthetics of your space but also contribute to a healthier, happier, and more sustainable environment.

Our commitment to quality, innovation, and customer satisfaction drives us to deliver green wall solutions that are tailored to your unique needs.

Ready to embark on a journey of transformation? Whether it's a residential, commercial, or public project, we're here to help you bring your vision to life.

Contact us today to discuss your green wall aspirations, get a personalised quote, or schedule a consultation. Let's embark on this green adventure together and turn your space into a thriving oasis of beauty and well-being.
